

# Whirl-a-Style Method

Supplies Needed: one Whirl-a-Style hairstyling device.

1. Grab hair and pull hair through tools slit.
2. Roll hair up towards top of head.
3. Snap the hairstyler closed in the opposite direction in which you rolled.

By using the Whirl-a-Style method you are rolling your hair onto itself which helps secure your hair. Your hair will remain in the perfect bun when you twist and twirl, run and roll, leap and land. The only time pins are needed is when you have layers. Just wrap the short layers around the bun like a button and pin.

This method creates a beautiful consistent chignon in less than a minute. Five different sizes for all lengths and thicknesses. Plus a multitude of different colors to choose from!

To make a bun on top of the head just add one step! Start by putting hair in a pony tail. Then continue with the basic three Whirl-a-Style steps: grab, roll and snap!

Whirl-a-Style allows every dancer or gymnast to concentrate more on their steps and not on their hair! It's as easy as one, two and three. So fast you can change hairstyles in between performances. Plus, there is no tug or pull on hair that may cause headaches or sore spots.

You can purchase the Whirl-a-Style hair tool at the following retail store:
